NOTICE OF AVAILABILITY OF ENVIRONMENTAL ASSESSMENT WORKSHEET FOR KLONDIKE CLEAN WATER RETENTION PROJECT

The Two Rivers Watershed District has completed an Environmental Assessment Worksheet (EAW) regarding its "Klondike Clean Water Retention Project" and is accepting public comments on the EAW until February 23, 2023.

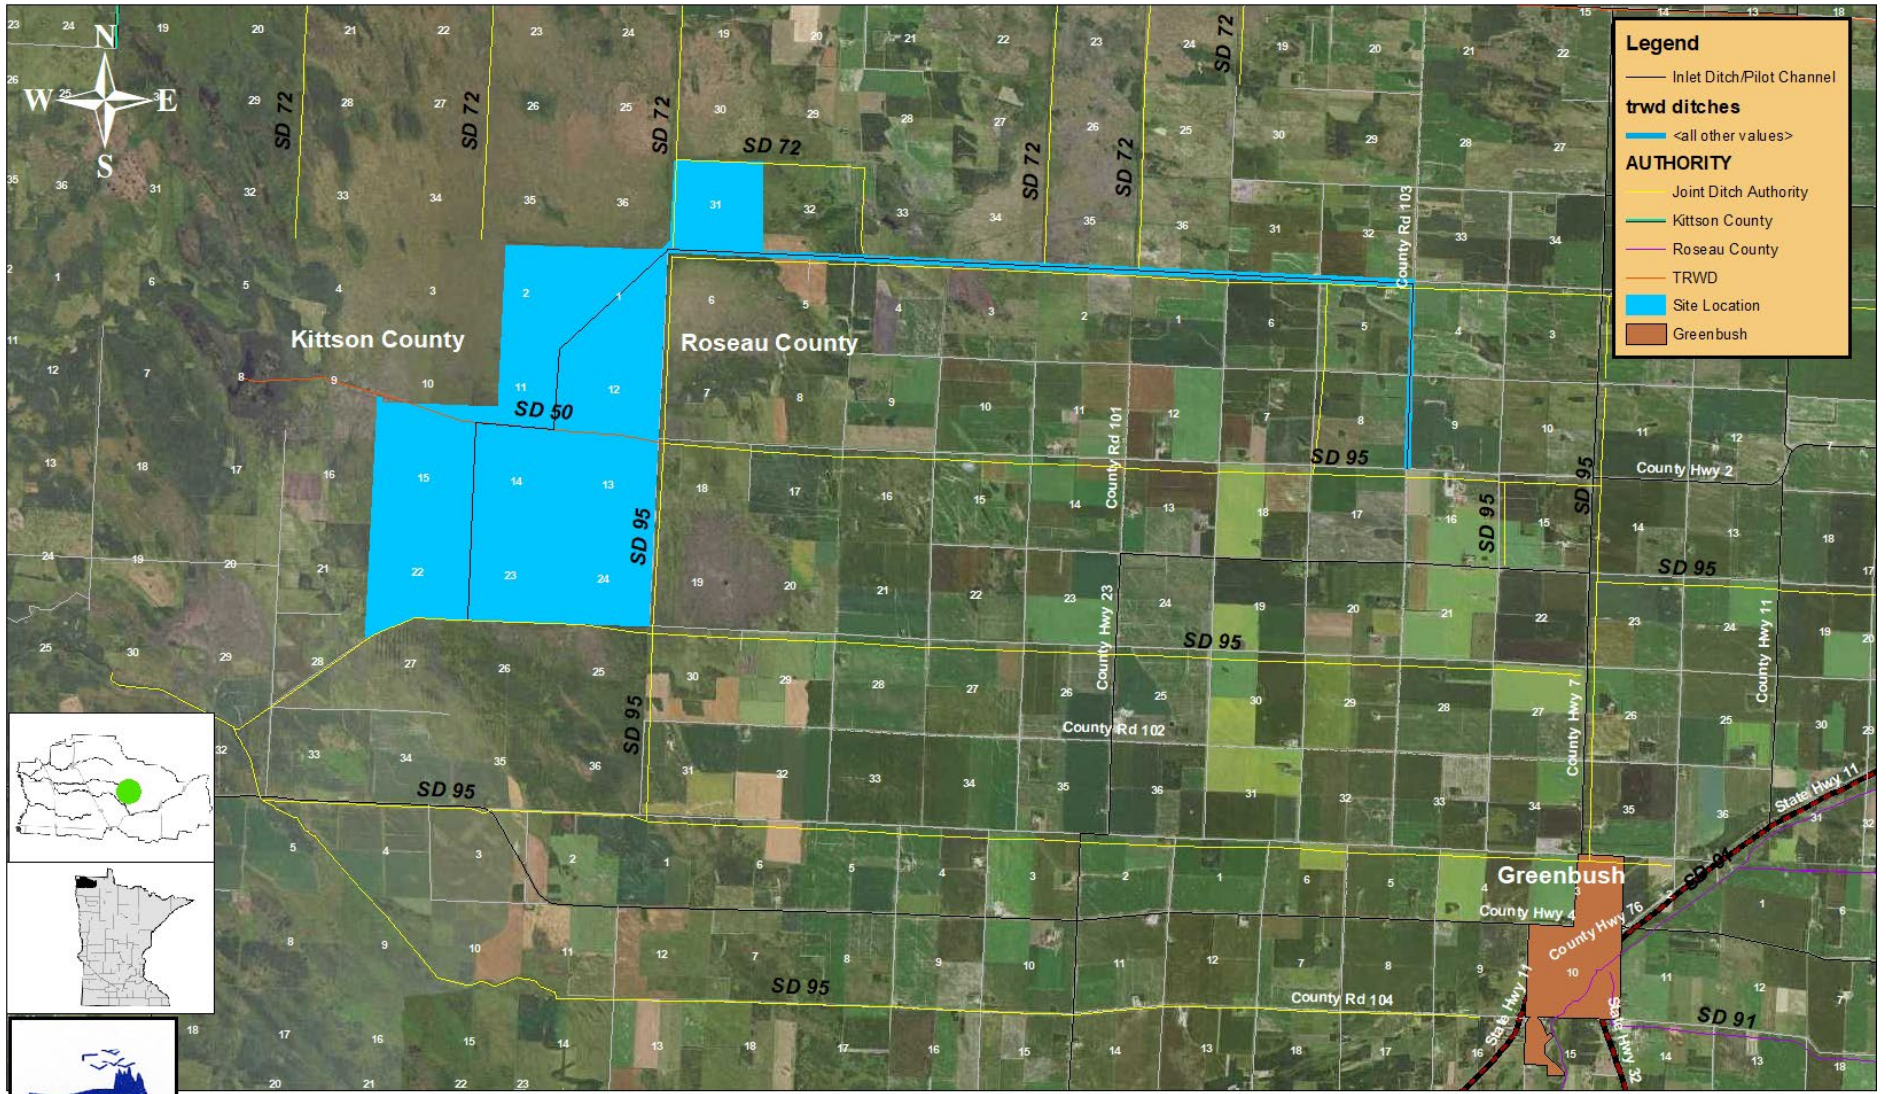

The Klondike Clean Water Retention Project (KCWRP) is a multi-purpose public project providing both flood damage reduction and natural resources enhancement components. Located in Roseau and Kittson Counties and within the Two Rivers and Red River watersheds, the project is proposed to reduce flooding, improve water quality, improve aquatic habitat, protect and enhance a prairie rich fen, and provide an adequate drainage outlet primarily for lateral 1 of State Ditch 95 and secondarily for State Ditch 72.

The EAW provides detailed information regarding the construction of this project and its potential effects on surface water, groundwater, ecosystems, and fish and wildlife habitats. The EAW and supporting documents can be viewed on the District's website at <http://www.tworiverswd.com/Klondike.html>. They can also be obtained by calling the District office at 218-843-3333.

Written comments will be accepted until 4:00 p.m. on February 23, 2023. These can be dropped off or mailed to the following address:

Two Rivers Watershed District
